Art Unit: 1724

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-4, drawn to a process for removing heavy metals from water, classified in class 210, subclass 748.
 - II. Claims 5-15, drawn to an apparatus comprising an electrolytic cell, classified in class 204, subclass 246.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus as claimed can be used to practice a materially different process, such as a process for treating a non-aqueous fluid. Claim 16 has not been included because it claims both an apparatus and process, which is improper U.S. patent practice.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 1724

5. Acknowledgment is made of applicant's claim for foreign priority based on an application filed in Italy on July 18, 2000. It is noted, however, that applicant has not filed a certified copy of the application as required by 35 U.S.C. 119(b).
